Box			ticle 35(2) with regard to novelty, inventive stoporting such statement	ep or industrial applicability;	
1.	Statement				
	Novelty (N)	Claims	1-5		YES
		Claims			NO
	Inventive step (IS)	Claims	1-5		YES
		Claims			- NO
	Industrial applicability (IA)	Claims	1-5		YES
		Claims			- NO
2.	Citations and explanations (Rule 7	0.7)			
	1. This repo	rt ma	kes reference to the i	following	
	document:				

- 2. Document D1 is considered to constitute the prior art closest to the subject matter of claim 1 (and claim 4). It discloses (the references in parentheses are to that document): an article of jewellery and a process for producing the same. The article of jewellery contains an illusion gem (20) set in a bore (16) in the body (18) of the article of jewellery.
- The subject matter of claim 1 (and claim 4) 3. therefore differs from the known article of jewellery in that a holding element is formed by a rotating tool.
- 4. The subject matter of claim 1 (and claim 4) is thus novel (PCT Article 33(2)).
- The technical problem addressed is to provide an 5.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

article of jewellery and a process which ensures

article of jewellery and a process which ensures an enhanced hold and an improved optical appearance of the illusion gem.

This problem is solved by independent claim 1 and by the independent process claim 4 in that a holding element is formed by applying friction to the body of the article of jewellery, in the marginal region of the bore, by means of a rotating tool, then by solidifying the material eroded from the marginal region of the body which surrounds the bore.

The advantage over the known prior art solutions is that the holding element ensures a particularly secure hold and an improved optical appearance of the decorative element.

6. The solution to this problem, as proposed in claim 1 (and claim 4) of the present application, involves an inventive step (PCT Article 33(3)) for the following reasons:

D1 does not disclose that the illusion gem is secured in the bore in the body of the article of jewellery by a rotating tool.

None of the other search report citations, either alone or in combination, discloses the features of independent claims 1 and 4.

Consequently, a person skilled in the art

International application No.
PCT/EP2004/013994

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
	proceeding from the closest prior art and seeking	
	to solve the stated problem, would not be prompted	
	by the prior art to modify the process described	
	in D1 in the manner proposed in claim 4 of the	
	present application.	
7.	The subject matter of independent claims 1 and 4,	
	and hence also of dependent claims 2 , 3 and 5 , is	
	therefore novel and inventive, and the	
	requirements of PCT Article 33 are met.	
8.	The amendments submitted with the letter of 21	
	February 2006 essentially consist in a	
	reformulation of the original features.
